

#### MODIFIED AUTO CLUB (MAC)

The MAC is a club of students from the APSIT who design & fabricate solar based automotives which are operated by a DC motor. The purpose of the MAC club is to build up interest towards theoretical as well as practical knowledge, along with management and team work among under graduate students. It gives students hands on experience in designing & manufacturing. The main aim of the club is to reduce the usage of organic fuel powered vehicles and design environment friendly electric power vehicles.

### **Objectives:**

- To provide interdisciplinary knowledge to the students.
- To develop the skills in automobile & green energy mobility sector.
- To develop Design, Manufacturing, Management & Team building skills amongst young aspirants.
- To give national level platform to the students through competitions, workshops and seminars.
- To give practical exposure to the students.

o spread social awareness about sustainable future.

# Thane engg college bags second prize in Asia's electric solar vehicle championship

Shrutika.Sukhi @timesgroup.com

Thane: After working for over seven months designing and manufacturing a solar car, students of an engineering college have helped their college bag the second prize in Asia's electric solar vehicle champions-

hip2019 A P Shah Institute of Technology (APSIT) was amongst the 58 teams in 28 states that

participated in the five-day competition. It was organised by the Imperial Society of Innovehicle as it was around 400kg.

We used polycarbonate sheets and reduced the weight to around 180kg. The car takes around six hours for solar charging," said Mithilesh Vekhande, vice-captain of the team.

The college bagged the first price in two categories - endu rance and cross pad. They even broke the record in the second category. The students said that they will work towards probably having a car running in their campus.

nic & Telecommunication streams. "We took turns everyday to ensure that the vehicle was and we had adequate time to test it. This was the second year of our participation. Last year, we learnt that we had to focus on reducing the weight of the
