### **Expert Talk on How to Prepare for GRE**

Graduate Record Examinations (GRE) is a standardized exam conducted by many institutes from United States and Canada for the students who are willing to apply for post graduation. To make the students familiar with the exam pattern and its norms a session for GRE Exam Guidance was arranged on 28 th August 2019. Mr. Mitul Gada was the guest lecturer. Session was started with the introduction of the exam pattern that GRE holds and how different it is from regular college level exams. The marking scheme for GRE and how score analysis is done was discussed. Mr. Gada then took few GRE questions to describe the pattern and diversity of questions asked in GRE exam. Later on the fees structure and cost of living in particular countries were explained.

The session was ended with the brief discussion of future opportunity and career paths which are opened due to GRE and the benefits of studying in a foreign university. Overall session was very informative and cleared the basic myths of engineers that verbal is very difficult in GRE and it could be cleared with basic techniques.
