Short Term Training Program

on

R Programming

R is the object oriented programing language used for statistical data analysis, graphical visualization and predictive modelling which is used in almost every field. It is open source free software. It provides a framework to experiment, analyse and visualize data in almost all the applications.. For providing detailed knowledge of this Department of Information Technology organized an three days STTP on," R Programming from 18/03/21 To 20/03/21.

Exploratory Data Analysis (**EDA**) is the process of visualizing and analysing data to extract insights from it and summarizing important characteristics of data in order to gain better understanding of the dataset was very interestingly explained by Prof Selvin Furtado. Prof Sonal Balpande gave an overview of R language and demonstrated it usage. Prof. Bhushan Jadhav, familiarize student with various statistics which can be collected from Data exploration in R. Mr. Vaseen Durrani, Director,Aedifico Tech Pvt.Ltd,Delhi conduct analytics and demonstrated data manipulation / visualization of on datasets

The session was overall informative, 69 students of BEIT attended it.
