Introduction:

On September 8th, 2022, the relevance of the AI-ML club and DevOps was announced. The inauguration began with the felicitation of our Chief Guests Mr. Sandeep Khuperkar and Mr. Pritesh Tiwari then Mr. Sandeep Sir inaugurated both the clubs followed by our cherished principal Dr. Uttam Kolekar Sir's speech.

Discussion:

Sandeep Sir enlightened everyone about how AI ML is the need of the hour and also the importance of this club.

He underlined the need of sharing any ideas, no matter how tiny, with your peers since, as the saying goes, "Everything begins with an idea." In his closing remarks, he exhorted everyone to take action for themselves "College will give you recognition to a certain

extent but it is you who will give recognition to yourselves as well as to your college". Pritesh sir emphasized the value of curiosity in learning AI ML and exhorted everyone to start creating algorithms in this area as there hasn't been much research done in it. The most common languages in this industry are Python and R, thus he underlined the importance of being thorough with both. He encouraged everyone to compete, even if they had no prior experience, because it would help them get started. He highlighted that "Rigidity is not sustaining in Data Science so keep updating yourself" because as Newton rightly said, "What we know is a drop, what we don't know is an ocean." "Data literacy is the most important thing in Data Science than technical expertise," he declared as he wrapped off his address.

Conclusion:

The inauguration ceremony of AI ML Club was felicitated by Prathamesh Hambar, Ambassador of AI ML Club.
