

Report on Training in Advanced IT skills under the IBM Skills Build Program in collaboration with ICT ACADEMY

Academic Year: 2025-26

Class/Dept: BE Comp/IT/AIML/DS

Date:19-01-2026 to 22-01-2026

Time:9 AM -4 PM

ICT Academy, successfully conducted a four-day offline training programme on Data Analytics under the IBM SkillsBuild program. The programme aims to bridge the skill gap and enhance the employability of students and professionals in emerging technologies, with a strong focus on inclusive learning and women empowerment.

The programme was inaugurated on 19th January 2026, marking the beginning of an intensive and industry-aligned learning experience. The training followed a blended learning model, combining online self-paced learning with offline instructor-led sessions.

Participants completed 16 hours of self-learning through the IBM SkillsBuild platform, covering fundamental concepts of Data Analytics. This was followed by Instructor-Led Training (ILT) conducted offline, which covered the basics of data analytics, practical industry use cases, data visualization using Power BI, and a capstone project, enabling participants to apply their learning to real-world scenarios through hands-on activities and interactive discussions.

A final assessment was conducted to evaluate participants' understanding and skill development. Upon successful completion, participants were awarded a joint certification from IBM and ICT Academy, adding significant value to their academic and professional profiles.

Overall, the training programme was highly impactful, equipping participants with essential data analytics knowledge, practical skills, and industry exposure empowering learners with future-ready skills and improving career readiness.

Glimpse of the training
